

TEKDEN

Premium Garden Dens & Performance Spaces

Log Cabins | Panel Dens | Golf Sims | Racing Dens | Cinema Dens

Designed by Experts.

Built for performance.

GSR GOLF SIM ROOMS + LOG CABINS FOR SALE UK = TEKDEN

Every Tekden space is designed from the ground up based on your space, your goals and your budget.

Tekden was created through the collaboration of Log Cabins and GSR — bringing together decades of structural build experience and specialist simulator design expertise.

Our focus is simple: to design purpose-built performance spaces that look exceptional, perform flawlessly and are tailored entirely around the end user.

Complete Design, Build & Integration

Tekden delivers fully bespoke garden dens and simulator spaces — offering as much or as little involvement as you need.

Traditional Log Cabin Dens

Crafted from spruce, our traditional log cabins create warm, characterful garden spaces built to last.

Insulated Panel Dens

High-performance insulated panel buildings designed for year-round comfort.

Golf Simulator Design & Install

Complete golf simulators designed, supplied and installed to deliver the ultimate at-home golf experience.

Racing, Gaming & Cinema Install

Immersive entertainment spaces built for sim racing, gaming and cinema setups with professional installation.

Supply-only & trade solutions

Supply-only buildings and trade packages for installers, builders and developers looking for reliable systems.

Online e-commerce

Order cabins, buildings and accessories online with fast delivery and expert support.

Why Home-owners Choose Tekden

- **Nationwide design & installation**
- **1,000+ completed projects**
- **Purpose-built for simulator use**
- **Honest, expert advice**
- **Industry-leading technology partners**
- **Ongoing aftercare & support**

Every recommendation we make is based on what works best for your space — not what's most expensive.

A simple, guided process.

Our step-by-step approach removes the guesswork, guiding you from idea to installation with confidence. With support at every stage, you get a fully customised space designed around your needs, style and performance goals.

1

Choose your Structure

Select the structural solution that best suits your space and style.

2

Design your experience

Configure lighting, finishes, turf and technology with expert guidance.

3

Build & install

Our experienced teams manage construction, fit-out and calibration.

4

Aftercare & support

Ongoing support, upgrades and advice long after installation.

A fully managed, end-to-end service ensuring your build is completed efficiently, professionally and to the highest standard.

Choose Your Structure

We offer two proven structural solutions

Designed for year-round use and full simulator integration.

TRADITIONAL LOG CABINS

- Norwegian Spruce Logs
- Individually milled to spec
- A more traditional aesthetic

INSULATED PANEL DENS

- Fully insulated modular panels
- Available in 3 different sizes
- A more modern aesthetic

2 Structural Solutions.
1 Performance Standard.

Log Cabin Structures

Traditional timber aesthetics, engineered for year-round performance.

Our log cabin structures combine the natural appeal of timber with modern construction techniques designed to support insulated, technology-ready interiors.

Each cabin is manufactured to order, offering full flexibility in size, layout and specification.

Construction & Specification Options

Traditional timber aesthetics, engineered for year-round performance.

Choice of Log Thickness

Available in a choice of 44mm or 68mm logs, our cabins are customisable dependant on your budget and thermal requirements.

Excellent Structural Integrity

Designed to withstand the vast weathers in alpine conditions, rest assured your cabin will be structurally strong for many years to come.

Suitable for use all year round

Exceptional insulation and thermal stability help maintain a comfortable internal environment in every season.

Fully Bespoke

Each cabin, whether one of our preset sizes or not; is manufactured specifically on a per-job basis as per your chosen size and specification.

Why choose a log cabin?

Relaxed Planning
In most cases, planning permission isn't required and buildings fall within permitted developement rights. Ask for more information.

Fast Install
Our experienced fitters will have your cabin fully installed within just a few days ready for your internals to be fitted.

All Season Comfort
Designed for year-round use, our cabins offer excellent insulation and airtight construction.

Any terrain
Due to our composite post stystem levelling the base, uneven terrain isnt a problem, saving money on groundworks.

Engineering
Manufactured precisely under controlled factory conditions to ensure the highest quality and smoothest assembley on site.

5 Year Guarantee
With a 5-year guarantee supplied by Tekden upon completion if you opt for cabin treatment/painting.

Insulated Panel Dens

Modular insulated panels, with a sleek aluminium finish with an optional cladded exterior.

Built for strength, durability, and thermal performance, Kingspan Insulated Panels are manufactured using high-quality low carbon steel and a precision-engineered insulated core for long-lasting reliability. Designed to meet stringent industry standards, our panels deliver outstanding weather protection, energy efficiency, and structural integrity.

Engineered for performance.

QuadCore Insulated Technology

Advanced Kingspan QuadCore insulation delivers outstanding thermal performance, energy efficiency & long-term reliability.

Maintenance-Free Design

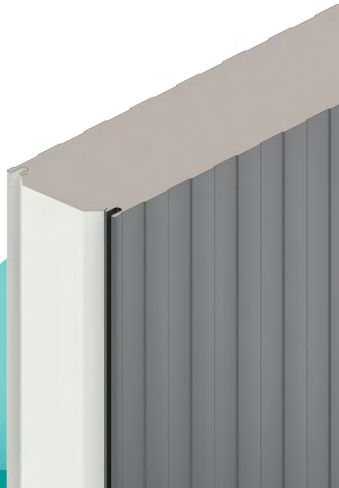

Durable steel panels with high-performance coatings ensure long-lasting appearance & protection with virtually no upkeep required.

Excellent Structural Integrity

Engineered for strength & rigidity, Kingspan panels provide robust structural performance across walls, roofs & bespoke applications.

Suitable for use all year round

Exceptional insulation and thermal stability help maintain a comfortable internal environment in every season.

Complete Electrical & AV Integration

Designed for Atmosphere. Built for Performance.

From initial wiring to final finish, we deliver fully integrated electrical, AV and lighting solutions

Every installation is carefully planned to ensure safety, efficiency and a clean, seamless aesthetic — with wiring, sockets and systems discreetly positioned to enhance both function and design. Whether it's immersive surround sound, dynamic lighting schemes, acoustic treatments or reliable power distribution, we create spaces that look exceptional and perform flawlessly. Because a premium space shouldn't just look impressive — it should feel it.

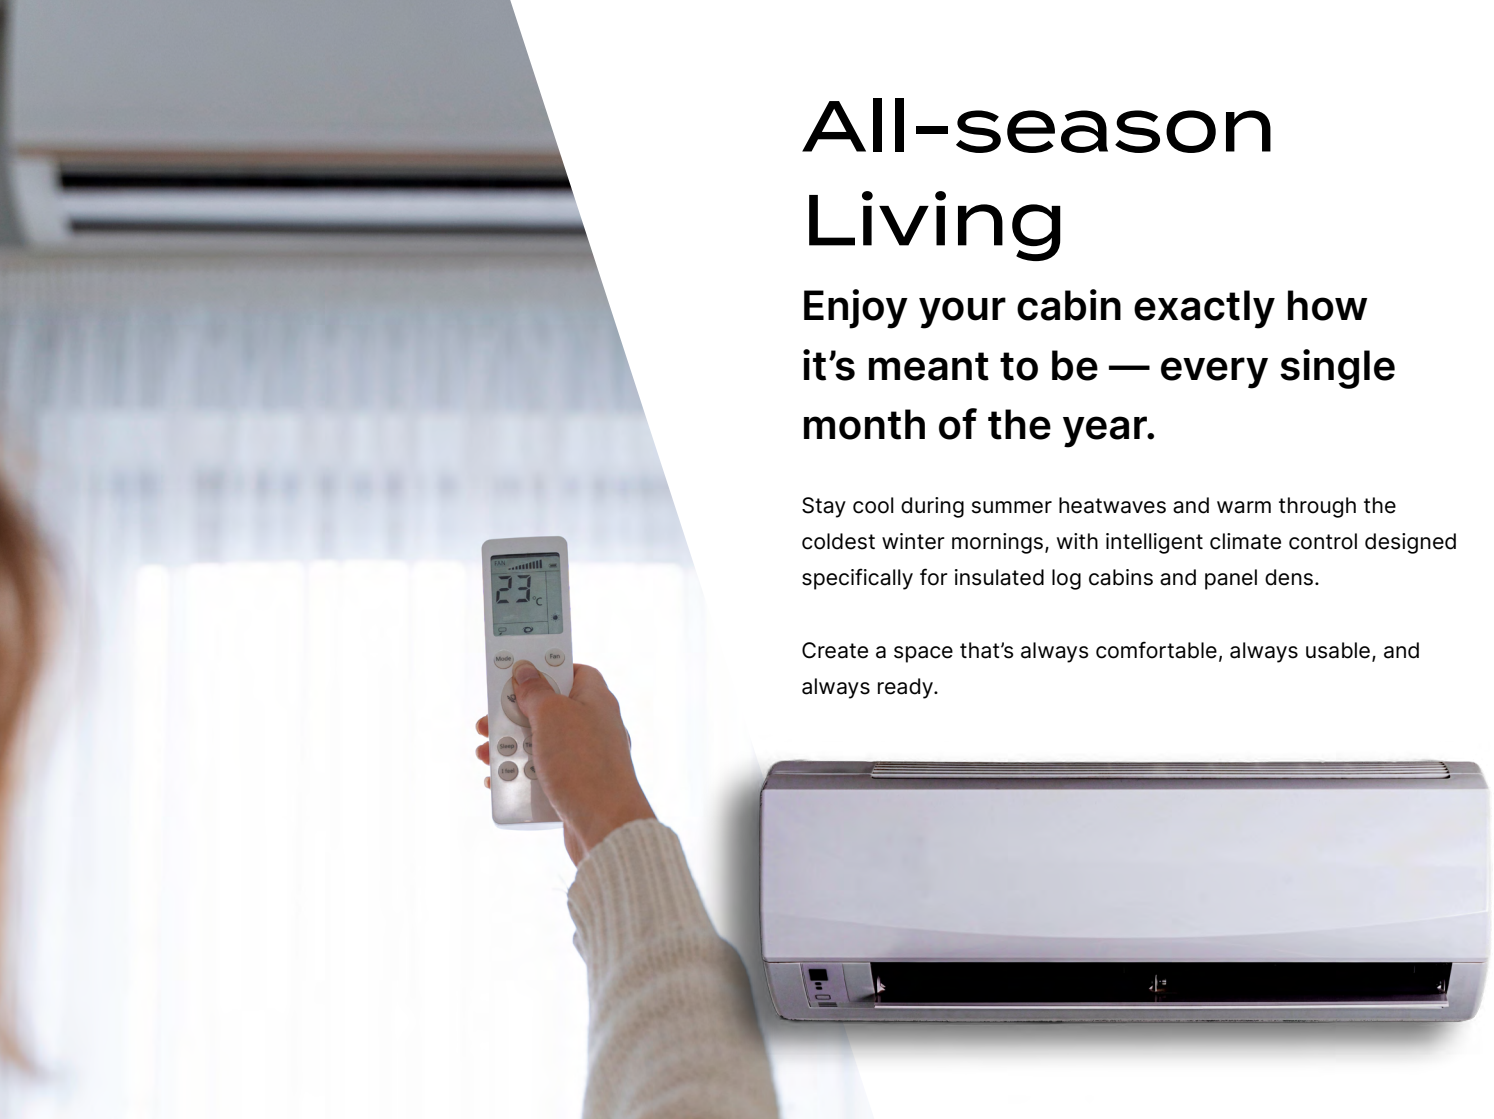

All-season Living

Enjoy your cabin exactly how it’s meant to be — every single month of the year.

Stay cool during summer heatwaves and warm through the coldest winter mornings, with intelligent climate control designed specifically for insulated log cabins and panel dens.

Create a space that’s always comfortable, always usable, and always ready.

Heating & Cooling

Our integrated systems provide both heating and cooling, keeping your cabin perfectly balanced without the need for additional standalone heaters.

Thermostat Control

Smart temperature control automatically adjusts to maintain your chosen setting — ensuring your space stays exactly how you like it, whether you're working, relaxing or playing.

Smart Compatibility

Compatible with leading smart home apps, allowing you to schedule, adjust and monitor your cabin's temperature remotely — so it's ready when you are.

Comfort All-year-round

No seasonal shutdowns. No uncomfortable extremes.
Just consistent, controlled comfort — whether it's a summer heatwave or a frosty winter morning.

Various brands available

We work with trusted manufacturers to supply and install the right unit for your cabin size, usage and budget — ensuring performance without compromise.

Multi Purpose Dens

RACING • GAMING • CINEMA

Your space. Your Escape. Your Rules.

Designed for more than just one passion. Our multi-purpose dens transform into immersive racing simulators, high-performance gaming rooms or luxury home cinemas, all within a purpose-built and insulated structure engineered for year-round comfort.

Whether you're chasing lap times, climbing leaderboards or enjoying movie nights with full surround sound, your den can be tailored to your lifestyle.

- **Visualise your space in 3D**

Don’t Be Fooled By Imitators.

We pioneered the dedicated golf simulator cabin in the UK.
Since then, others have attempted to replicate our designs - often without the technical knowledge, structural engineering or performance understanding required for a true simulator cabin build.

At Tekden, every cabin is engineered specifically for ball flight, impact resistance projector alignment and launch monitor accuracy as well as being a structurally sound space to last for many years to come.

TEKDEN

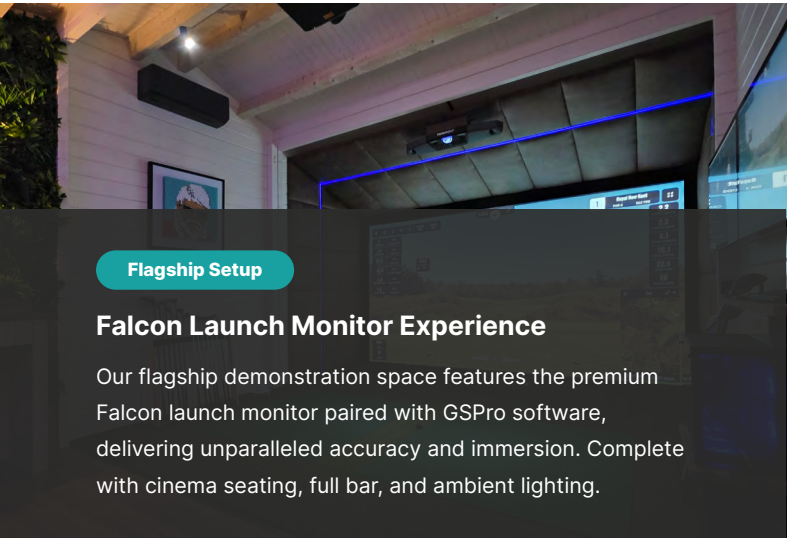

- Real Spruce Timber Cabins
- Designed for Simulator Use
- Size/Height Clearance
- Real-time pricing transparency
- UK Specialist team
- Premium & Tested technology

NOTDEN

- Pine or Inferior Timber
- Sub par log thickness
- Incorrect Room Dimensions
- Hidden Costs
- No Simulator expertise
- Inferior or inadequate technology

Enjoy peace of mind with comprehensive support and coverage after your simulator installation.

Customer Reviews

Explore our flagship and compact simulator setups in a try before you buy atmosphere

★★★★★

Darren H

The step-by-step plan was clearly explained, and everything was delivered on time and efficiently.

The builders, painters, and fitters were polite, respectful, and went out of their way to add value.

★★★★★

Edward G

Excellent service and delivered exactly what they quoted for. They helped with: initial site visit, planning permission, build/install, and a full handover to show me how to use all the features.

★★★★★

Carl S

Can't recommend these guys highly enough. From design to aftercare they've delivered to the highest standard. The cabin is amazing quality, the golf tech is top drawer and the serviced they provided it all with was second to none. Craig, Chris and Ben were all great to work with.

★★★★★

Christopher D

My experience with Tekden was fantastic from start to finish. It is clear they really care about delivering a premium product and a first rate customer experience. They are very good at what they do and the end result is everything I could have hoped for.
